Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

1. In papers filed on July 2, 2004, applicant canceled claims 2, 3, 6-41, 43-46, 48-51 and amended claims 1, 4, 5, 42 and 47.

Response to Arguments

2. Applicant's arguments with respect to claims 1, 42 and 47 have been considered but are not persuasive.

Applicant argues that the added limitation of "...or for processing the image so that the image data is not faithfully reproduced and outputting the processed image data." is not taught by Bobrow. The amended claim establishes this limitation as an alternative approach by using the word "or" and need not be necessarily taught by the prior art. Bobrow discloses the first limitation of output means for, when said determination means determines that the image data is the specific image, selecting and outputting image data in a lowest resolution layer (column 31, lines 52-67).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 2622

4. Claims 1, 5, 42 and 47 are rejected under 35 U.S.C. 102(e) as being anticipated by Bobrow et al. (US patent 6,529,285).

Regarding claim 1, Bobrow discloses an image processing apparatus comprising:

input means 40 for inputting image data which complies with a hierarchical data format that hierarchical stores image data of a plurality of resolutions (column 34, lines 47-67);

determination means for determining if the image data is a specific image (column 31, lines 38-51); and

output means for, when said determination means determines that the image data is the specific image, selecting and outputting image data in a lowest resolution layer (column 31, lines 52-67).

Regarding claim 5, Bobrow discloses the apparatus according to claim 1, wherein said determination means determines the specific image when the image data has a copyright (column 31, lines 38-51).

Regarding claims 42 and 47, arguments analogous to those presented for claim 1, are applicable.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2622

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Babrow et al. (US patent 6,529,285) in view of Yeomans (US patent 4,800,379).

Regarding claim 4, Bobrow does not disclose the apparatus according to claim 1, wherein said output means enlarges the image data in the lowest resolution layer to a size of image data in a highest resolution layer, and outputs the enlarged data. Yeomans discloses this limitation in column 1, lines 33-47). Bobrow and Yeomans are analogous art because they are from the same field of endeavor that is displaying images with various resolution levels. Therefore, it would have been obvious to a person skilled in the art, at the time of invention to use Yeomans for expanding the image data to fill the selected area.

Conclusion

7. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 2622

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
